

## **PIC-PG1** - ICSP SERIAL PORT DONGLE PROGRAMMER

### **FEATURES:**

- PIC-PG1 is programmer based on **JDM** design which takes all necessary signals and power supply from RS232 serial port. It uses 6 pin 0.1" step ICSP connector to connect to target board with the PIC microcontroller.
- The supported devices depend on the current version of ICPROG software.
- Dimensions 50x30 mm (1.95x1.2") + 30 cm (12") cable

### **DOCUMENTS:**

- NOTE: The programmer may not work with low power serial interfaces - i.e. laptop or notebook serial ports. USB to serial cables have also not been proven to work.

### **HARDWARE:**
