Notes

- Minimum load required to meet noise and ripple and initial set accuracy specifications. Below 25% load, noise and ripple increases to 200 mV pk-pk typical and load regulation to ±1% max.
- Cross regulation is ±5% when one output is at 100% the other is varied between 25% and 100%.
- For optional 3000 VDC isolation, add suffix '-H' to end of part number.
- For optional metal case version, add suffix '-M' to end of part number, eg. JCB0324S12-HM
- For alternative pin out, add suffix '-Z' to end of part number, eg. JCB0324S12-HMZ
- Input current measured at nominal input voltage
- A 220 µF/100 V capacitor across the input is required in order to meet EN61000-4-4 & EN61000-4-5.
