# ESD MATS

# Art. 749DUO ESD FLOOR RUBBER ROLL MAT

Colour: GREY with dot decoration Structure: double layer dissipative/conductive Thickness 2.5mm Roll size: 1,9m x 10m (19m2) Roll weight 3,8 kg/m2 Surface resistance 5x106 - 5x108 Resistance to ground 5x106 - 5x108 Charge decay time <0.5 sec.

# Art. 749 DUO KIT

ESD floor mat kit 1200x1900mm includes one 749 DUO floor mat cut with a 10mm ground stud and one 601 ground cord

# Art. 749 DUO RUNNER KIT

Flooring runner kit for passage areas (personnel and trolleys). Includes one cut art 749 DUO size 950x3000mm, ground cord art 601 and 2 ground male snaps.

# Art. 157ROLL 1.2 & 157ROLL 1.0 ESD TABLE RUBBER ROLL MAT

High temperature resistance: over 450°C Material: synthetic rubber Colour: GREY, BLUE or BEIGE Structure: double layer dissipative/conductive Thickness 2.0mm Roll size: 1,22m x 10m (12,22m2) or 1m x 10m (10m2) Roll weight: 3,3 kg/m2 Surface resistance: 5x106 - 5x108

# **ESD BENCHMAT KITS**

The kits include either 157 benchmats cuts (rounded edges and ESD symbol), 1x ONE TOUCH wristband set and 1x art. 601 ground cord for the mats (moulded resistor included).

MATS GROUNDING Art 601 Ground cord with 1 MOhm resistor

# MATS CONNECTIONS CORDS

Art 603-32 Mats interconnection cord 32cm Art 603-200 Mats interconnection cord 2m Mat interconnection cords 10mm to 10mm female snaps, no resistor

# **GROUND ADAPTER**

**Art 610** Protected adapter, banana 4mm to female & male snap 10mm

Art CPG1222 Common point to ground to be fixed under the workbenches. Metal L-shaped bracket, 1 Meg resistor, 2 protected banana 4mm receptacles, 2 male snaps 10mm. All points are equally grounded.

# **ESD SNAPS & PUNCHING TOOL**

Art 604M10-100 : pack of 100 male snaps Art. 604F10-100 : pack of 100 female snaps Art. 605: punching tool for snaps insertion Designed for mats and equipment ground connections

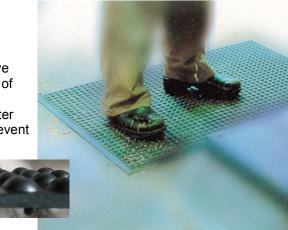

# **ESD ANTI-FATIGUE MATS**

# Art. RLX

RLX is an ESD anti-fatigue mat, manufactured with ESD conductive rubber, ensu-ring instant and continuous drainage of static charge of workers to prevent accumu-lations.

Designed specifically for standing workers to ensure relief and better blood circula-tion, reduced stress on spinal coloumn and joints, prevent form slips and eventual injuries.

# ESD FLOOR WAX & CLEANER

# Art. E-CLEAN

Liquid product designed for fast and effective floor cleaning procedures. E-CLEAN has been designed expressely for ESD treated flooring s periodic (also daily) maintenance. In fact the correct usage of E-CLEAN will not alter the dissipative performances of the subfloor.

Manual cleaning operations, or with wash&dry equipment, or also wiith spray cleaners.

FORMULATION: Light solvents mix, low foams activators, perfume and other minor components

# Art. E-WAX

Polymeric antistatic emulsion particularly suitable for treating antistatic and electroconductive ESD floors. It is advisable for electronic production areas, for E.P.A.

maintenance.

FORMULATION: Acrylic metal antistatic polymers, polyethilenic waxing emulsion, levelling substances and coadjutants. No harmful substances.

# Art. 5600

5600 dissipative floor paint is a one part latex coating ideally formulated for the electronic manufacturing environment.

- DISSIPATIVE quickly drains static charges
- DURABLE hard, abrasion resistant formulation
- ENVIRONMENTALLY FRIENDLY no solvents
- EASY APPLICATION apply with rollers
- LOW VOC water based, no amines or isocyanates
- ECONOMICAL low cost per square foot
- AESTHETIC neutral, light grey
- EASY CLEAN UP soap and water
- RESISTIVITY consistent 106 108 Ohms/sq. reading
- ENHANCED POLYURETHANE one part system

# **ESD FIELD SERVICE KIT**

ESD field service kit, designed for on-field operators. Static dissipative vynil,red colour on both faces, rounded sewn borders, double pocket to carry tools for service operations, includes the ONE TOUCH wristband, banana ground cord, the 608 ground banana cord Dimensions: 600x600mm

# Art. KAS 9700

# **ESD CHAIRS**

# VERA X and VERA CLEAN X are the new ELME ESD chairs models, meeting ESD requirements of IEC 61340-5-1 std and ESDA 2020 std.

- 3 heights available (low, medium and high), fully adjustable, choice of fabric or vynil
- High quality **gas lift**, european made, which ensures continued service in time under heavy duty usage.
- Extra-soft high-density foam lining of seat and backrest
- Flame and burn resistant ESD fabric and ESD vinyl.
- The **backrest** is made with conductive plastics for total ESD protection.
- The **base** is made in polished ESD aluminium antiscratch
- Adjustable or fixed armrests available

VERA X		
Fabric (models VERA)	Unflammable	UNI EN 1021 Part 1° e 2°
ESD fabric weight	340gr	1 x 1,45m
ESD fabric resistance	1x10⁵ < R < 8 x10⁵	IEC 61340-5-1
Chair resistance to ground	1x10 <sup>5</sup> < R < 1x10 <sup>6</sup>	IEC 61340-5-1
Fabric Static decay	1180 V to 50 V< 1,5 sec	IEC 61340-5-1
Color	Grey anthracite or blue (on request)	

### VERA CLEAN X

Vinyl (models VERA CLEAN)		
Resistance fabric point to point	10 <sup>6</sup> Ohm	IEC 61340.5.1
Chair resistance to ground	10 <sup>6</sup> Ohm	IEC 61340.5.1
Static decay time	< 2 sec	IEC 61340.5.1

### PHYSICAL FEATURES

Base	Polished aluminium	Inherently conductive
Base diameter	680 mm	
Adjustments	Gas lift	Made in Europe
	Height of the seat models X1R	420-540mm (120mm excursion)
	Height of the seat models X1P	400-520mm (120mm excursion)
	Height of the seat models X1-300R	550-670mm (120mm excursion)
	Height of the seat models X1-300P	530-650mm (120mm excursion)
	Height of the seat models X2R	620-880mm (260mm excursion)
	Height of the seat models X2P	600-860mm (260mm excursion)
	Diameter footrest models X2	420mm
	Height of the backrest (both models)	430-490mm (60mm excursion)
	Backrest width (both models)	470mm
	Depth of the backrest	430-580mm (150mm excursion)
	Inclination of the backrest for permanent contact with the operator's back	17° range angle of inclination
	Foam density	30kg/m3 (seat 40mm thick – backrest 35mm thick)

# **ESD POLYURETHANE CHAIRS**

ESD foam chair, seat and backrest made of PUR integral foam. Chrome conductive base, ESD wheels.

Art. VERA PU 1base chair, gas lift, ESD PU foamArt. VERA PU 2high chair, gas lift, ESD PU foam, footrest

# ESD SEAT CHAIRS COVERS Art SITCOVER

Fabric conductive cover set for seat + back, designed to convert standard chairs into ESD safe ones. The set includes the two covers, connection cord and ground cord

# ESD STEP STOOL Art GABEL

Use GABEL to reach the highest shelf. This ESD safe step stool is easily movable due to suspended wheels and low weight. GABEL blocks down with as low as 5kg weight. Resistance 10exp8 Ohm.

# ESD TRASH CAN Art BASKET 13

Conductive plastic waste paper basket designed for E.P.A..Volume 13 lt.

# EPA BOUNDARY TAPE

Art REA EPA EPA PVC limits tape, high resistance to passage and high visibility

**EPA ATTENTION SIGN** 

Art EAL 3060 Rigid plastic EPA attention sign. Size 30x60cm.

# **EPA FLOOR / WALL ADHESIVE SIGNS**

Art EAL 3232 PVC floor or wall signs for EPA. Diam 32cm. Packs of 10 each.

# **ESD BADGE HOLDER** Art. Badge Holder

ESD rigid transparent badge holder with clip

Dimensions: 91x61cm Max dim badge: 89x55mm Surface resistance: 109 Ohm

### 

# ESD SWEAT SHIRT Art. PULLOVER

Designed to join ESD protection and protection against colder climates, the new PUL-LOVER is a soft and warm sweat shirt, with zip closure and long sleeves. The special fabric formulation ensures the best wearability, while the PULLOVER is designed as a unisex shirt, both for men and women.

# **ESD POLO SHIRTS & T-SHIRTS**

Available in different colours, with soft and comfortable ESD knitted fabric in different colours, with short or long sleeves, and ESD symbol. The special fabric formulation ensures the best wearability.

Art. POLO SS polo ESD short sleeves Art. POLO LS polo ESD long sleeves Art. TS-SS T-shirts ESD short sleeves Art. TS-LS T-shirts ESD long sleeves COLOURS: WHITE-GREY-BLUE-BLACK

# ESD WINTER JACKETS Art. 927 Jacket no sleeves Art. 925 Jacket with sleeves

Designed for colder climates, available with and without sleeves. Outside and middle layer in static dissipative polyester fabric. The inside is in warm cotton fleece. Unisex design with ESD logo and conductive cuffs.

Straight style - All sizes avaiilable - ESD symbol - 2 sidepockets - Rubberized waist

ESD-DUTY JACKET Art 928

Manufactured with conductive mix material, closure by Velcro, reflective signs highly visible, ESD symbol. Typical resistance: <10<sup>7</sup> Ohm

ESD OVERALL AND JACKET Art 930 ESD trousers with suspenders Trousers with ribbon, 3 pockets, zip fastener Art 931 ESD working jacket Jacket with 2 sidepockets, 1 breast pocket

ESD CAP

Art 932

# ESD MICROFIBRE WASHABLE SHOES—ALL MACHINE WASHABLE 40°C

# RADO (35-47)

ESD microfibre clog with back detachable heel belt, heel protection, polyurethane sole, FTB inner sole, perforated upper shoe, standard or safety version (SS-steel toe cap)

Art. RADO WHITE (meets EN 20347-2012—SRC) Art. RADO BLACK (meets EN 20347-2012—SRC) Art. RADO WHITE SS (meets EN 20345-2011-SB-SRC)

Art. RADO BLACK SS (meets EN 20345-2011-SB-SRC)

# MOKA (35-47)

# ESD FOOTGROUNDERS AND COVERSHOES

# Art. STV-UR-CLIP

Heel grounders with extra-resistant rubber, clip closure and safety 1MOhm resistor

# Art. STV-DR-CLIP

Toegrounders with extra-resistant rubber clip closure and safety 1MOhm resistor

Art. STV-VELCRO-EL

Heelgrounders with elastic ankle band and velcro closure and safety 1MOhm resistor

# Art. STV-SOLE

Full-sole grounders with extra resistant rubber, clip closure and safety 1MOhm resistor

# Art. STV-ONE SHOT

Disposable one-shot footgrounders with semi adhesive conductive tape.

# Art. ESD COVERSHOES

Disposable polypropilene elasticated blue cover shoes with conductive grounding strip

Art. HOOK ESD COVERSHOES Polypropilene elasticated ESD covershoes with conductive strip and hooks for dispenser box

Art. HOOK COVERSHOES BOX Floor dispenser box for HOOK ESD COVERSHOES

Art. CPE COVERSHOES Polyethilene covershoes

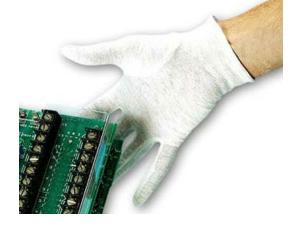

# **GROUNDING PERSONNEL**

# **ESD GLOVES**

COTTON GLOVES Art. GNB

ESD low static cotton gloves, white colour, available under MOQ (sizes M & L)

# CONDUCTIVE PALM FIT GLOVES Art. GNK DOT

ESD conductive gloves with PU palm protection , sizes S to  $\mathsf{XL}$ 

# CONDUCTIVE TRICOT GLOVES Art. GNC PALM

ESD conductive gloves with PU palm protection, seamless finger tips, sizes S to XL

# MID TEMPERATURE GLOVES Art 734G

ESD PVC gloves with interlock cotton lining for comfort and sweat absorbtion. Lightweight and heat resistant for maximum 150-200°C designed for hot boards handling. One size fits all.

# HIGH TEMPERATURE GLOVES FOR WET CONTACT Art. 70G

Packaged for ISO 5 (Class 100). Wet or dry contact temperatures from -61.4°C to 232°C PolyTuff silicone elastomer is sulfur-free. Excellent resistance to chemicals, solder and fluxes. Size: Hand Specific -M, L, XL Pack: 1 Pair/Poly Bag.

# EXTREME HIGH TEMPERATURE GLOVES Art. 50G

Withstand dry high temperatures (range –210 to +760°C), ESD protection 10\*\*9Ohm - No asbestos or fiberglass Packed in class 100 (ISO5), single bags each pair. Sizes M-XL

# Art. 59G

Withstand dry high temperatures (range (-134C to 537°C), ESD protection 10\*\*9Ohm - No asbestos or fiberglass Packed in class 100 (ISO5), single bags each pair. Sizes L-XL

# E3-OPERATOR GROUND

# CHECK Art. E3

E3 Dual ESD Tester for bands and footwears. E3 has been designed to test the performance of ESD wrist bands and footwears such as shoes or footgrounders.

E3 is designed to operate tests in accordance with IEC 61340-5-1:2007 standard.

E3 performs test on the ESD wristband and the ESD footwears automatically, with separate test for left and right foot. The operator can easily select the test to perform (band only - shoes only - shoes and bands together). E3 includes a dual large and comfortable foot plate (for left and right foot). E3 shows results as High, Pass, or Low resistance values. A relay output can easily connect to elec-

trical doors opening for access in restricted EPA areas. E3 works with battery or external power supply. The kit includes the tester, the wall mount yellow panel, the dual foot-plate, all cords and , with SPS version, the power supply

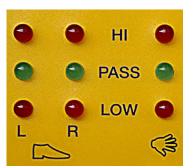

# MODE SELECTION

On the top right you find the MODE SELECTOR which enables you to select the kind of test you like to perform

# WRISTBAND ONLY FOOTWEARS ONLY WRISTBAND AND FOOTWEARS

# L.E.D. INDICATIONS

The L.E.D. indication is designed to provide an immediate visual reading of the results of the performed test on footwears and wristbands "HI" L.E.D.s (red colour) indicate that the equipment (footwears and/or wristbands) show an electrical resistance too high, exceeding the top limit of the correct range "PASS" L.E.D.s (green colour) indicate that the ESD equipment (footwears and/or wristbands) show correct electrical resistance values (within the range) "LOW" L.E.D.s (red colour) indicate that the equipment (footwears and/or wristbands) show an electrical resistance too low, exceeding the bottom limit of the correct range

# **TECHNICAL INFORMATIONS**

tester dimensions tester weight tester weight with battery footplate dimensions power supply external power supply (optional) colour Meets IEC 61340-5-1:2007 158x95x60mm 240 gr 280 gr 380x380x8mm battery 9V 220V AC/ 9VDC white box, yellow/black panel, coloured LEDs

# POCKET SURFACE METER Art MIMEG

This pocket meter has been designed to measure electrical resistivity (EIA 541/ASTM D-257) and resistance to ground on different surfaces in the E.P.A..LED indication between 103 and 1012 Ohm. Includes electrodes on the back side and is supplied with a ground connection cord.

# PROFESSIONAL SURFACE METER Art E-MEG

This instrument will test point-to-point, surface resistivity and resistance to ground.

The meter indicates conductive by green LEDs from 10^3-10^5, static dissipative by yellow LEDs from 10^6-10^11 and insulative by red LEDs 10^12+. Test voltage: 10^3-10^5 10v 10^6-10^12 100v Automatic voltage switch. Weight: 250 grams (instrument only) Available with electrodes and case.

# PROFESSIONAL SURFACE METER-TESTS

# OHMS, RH & TEMPERATURE Art MULTIMEG

This professional digital electrical resistance meter kit, automatic switch 10-100V to test both conductive and dissipative surfaces, digital display, measurement of RH and temperature

# **ESD FIELD METER** Art. EOS 2001

EOS-2001 is a digital static field meter measuring a range from 0 to + / - 19.999V. Featuring ""HOLD"" mode and distance lights to 1 inch for precise testing. Easy readable digital display, tests kV per Inch.

# ESD WORKSTATION MONITOR Art. X-1B-1M

X 1B-1M allows real-time monitoring of grounding connections for1 operator and 1 workstation. Electronic circuitry continuously checks the grounding of the operator wearing a standard single-cord wristband. The X 1B-1M simultaneously checks the effective grounding of mats (both table and floor mats) by simply connecting it to the ground mains and to the ground cords of the mats. Malfunctions are alerted by coloured LED and audible tones. The monitor is supplied with instructions, ground cords and power supply.

# **ESD BAGS AND BUBBLES**

# ANTISTATIC BAGS

Polyethylene antistatic bags are designed to replace staticgenerating packaging materials, protecting components handled into the E.P.A.. Flexible, pink-transparent, strong sealings, durable ESD features, ESD symbol included on each bag. Wide range dimensions available.

Art. SA antistatic bags

- Art SA: antistatic bags one side open
- Art SAC: antistatic bags with zip closure
- Art SA/T: antistatic tubing

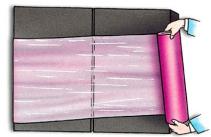

# STATIC SHIELDING BAGS

**SHIELDO SM** static shielding bags are designed to provide an effective shield against electrostatic discharges on sensitive components and assemblies. The metal-in structure provides a durable protection of the metal layer, and an effective Faraday Cage protection on the content. Shielding bags are indicated for ESD protection both inside and outside the E.P.A.

Art. SHIELDO SM: static shielding bags one side open Art SHIELDO SMC: static shielding bags with zip closure

# ANTISTATIC STRETCH FILM

Art FE-AS-30

Wrapping extensible stretch film in rolls of 300m, height 500mm, thickness 25 micron

# ANTISTATIC BUBBLE BAG

Art SAB

Antistatic bubble ESD bags, pink poly, with closure pad, to protect parts from mechanical shock.

# ANTISTATIC BUBBLE ROLL

Art PLAC Bubble film roll to protetch ESD sensitive parts from mechanical shock.

# VACUUM BAG SEALER

# **SEAL 4000**

SEAL 4000 vacuum sealers operate by sealing bags and extracting the air (and moisture) at the same time. Repeatable operations with vacuum timing control & sealing timing control, automatic jaws opening at the end of each cycle. Superior aspiration capability through the chamber vacuum system, extracting air from all the open side and leaving no air residues even in hidden spots. Rugged allmetal case, effective power and attractive pricing. Jaws sealing lenght 520mm. Available 200 or 110V versions, with or without gas injection system

Art SEAL 4000: 520mm vacuum sealer. 220V or 110V Art SEAL 4000 G: 520mm vacuum sealer - gas injection. 220V or 110V Art SEAL 9000: 800mm vacuum sealer. 220V or 110V Art SEAL 9000 G: 800mm vacuum sealer - gas injection. 220V or 110V

# BARRIER BAGS FOR VACUUM SEALERS SHIELDO SD

Barrier EMI/RFI anti-humidity bags are designed specifically for dry vacuum packaging of sensitive parts in connection with SEAL 4000 machinery. These bags keep air, moisture and oxigen out for longer periods. Moreover they provide an effective shielding against statics, RFI and EMI interferences (meet MIL B 81705-C).

# **HUMIDITY INDICATORS & DESSICANTS**

Accessories for humidity control inside the bags. The spots on the indicators irreversibly change colour when unwanted humidity enters the bag, the desiccants eliminate the residual humidity after the packaging process.

Art DESY: dessicants in various sizes & materials

# **STANDARD SEALERS & CUTTERS**

Heat sealers designed both for ESD bags and tubings. Adjustable sealing time fits material and the thickness of the bag. The models with the cutting blades will turn tubing into single bags. Seal width: 2mm - Max material thickness: 2x0.125mm—available versions with timer and magnetic closure **Art SEAL HANDY 300 CUT** - 300mm with cutting blade **Art SEAL HANDY 400 CUT** - 400mm with cutting blade **Art SEAL HANDY 500 CUT** - 500mm with cutting blade

# FLEXIBLE PACKAGING

# TAPES AND LABELS

# **ESD PACKING TAPES**

ESD tape for intimate packaging of sensitive devices, do not generate static charges during un-rolling, do not leave residues.

# ION GUN

The ION GUNS are designed to remove dust, residues and other contaminants from electronic assemblies, plastic moulded parts, plastic sheets, lenses, and other dust sensitive surfaces. The air compressed streamflow passes through an ion nozzle which generates positive and negative ions at high voltage. The compressed air will reach the surface to be cleaned and removes all contaminants without generating a static charge on the surface itself. In this way, the surface will result clean and neutral. No static filelds will re-attract the dust after the action. ION GUNS are particularly indicated during precision assembly processes where the plastic parts need to keep clean and neu-

# Art. ION GUN G9

This ion gun is lightweight, ideal for prolonged operations. The emitter is protected on the top by a screwed metal point. No danger of touching the charged emitter Easy periodi cleanring of the emitter The air compressed inlet is inside the handle, for the best ergonomy. No need of external power supply, needs just a plug in of 220Vac.

# ION BENCH BLOWER-LARGE ION BLOW Art VSE3000

Effectively eliminate static charges on your work bench quickly and reliably with VSE 3000.

The VSE 3000 has been the first ionizer designed meeting the testing procedures established by EOS/ESD Standard 3.1, the accepted industry standard for benchtop ionizer testing.

Performance: variable speed fan and integral air flow diffuser.

Reliability: Reliable ion balance. Patented, self-balancing circuitry that maintains a balance window of ± 5 Volts. Ion balance is maintained even during the brownouts and voltage fluctuations that cause other ionizers to operate out of balance.

Convenience: exceptionally quiet, the VSE 3000 delivers a powerful air flow with low noise levels thanks to sophisticated sound absorbing materials. A thermostatically controlled heater provides operator comfort. The VSE 3000's stand requires minimal workbench area, and can be mounted over-head or on walls or pedestals.

Larger ionized area: VSE ionizing area, due to its particular design, goes from 30° on the right to 30° on the left side.

UL: VSE 3000 is certified by U.L. (Underwriters Laboratories). Adjustable Temperature : VSE 3000 streamflow of air can be adjusted in intensity and in temperature (+ 8°C ther-

mostat). Moreover a filter can be mounted for cleaner air

# **ION BLOWER—SMALL FOOTPRINT** Art. ION ONE

ION ONE is the benchtop ion blower designed to operato on specific place on the workbench. Adjustable airflow, optional warmed airflow, the ION ONE offers very good performance at competitive price.

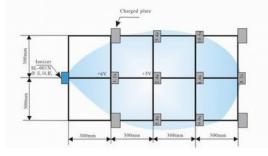

# **FEATURES**

- Adjustable airflow •
- Input Voltage: 220V/110V
- Power Consumption: Max 270VA •
- Operating Temperature:  $-10 \square \sim +45 \square$ .
- Air Volume: 45~110CFM •
- Weight:2.8KG
- Size: 190(L)\*95(W)\*260(H) (mm)

# PERFORMANCE

Ideal distance from the surface is 300mm, voltage decay 1kv-100v: 1,0—1,3s at room temperature

Back heater control

# **OVERHEAD ION BLOWERS**

The **OH OVERHEAD BLOWERS** are designed to minimize the static charges accumulations on the workstation where ESD sensitive devices are handled. The OH blowers are designed to cover the area with fans pushing ionized balanced airflow on the area to combine with static charges excesses generated by the oridyction process (material handling, soldering operations etc).

- Quickly neutralizes static charges,
- Light and compact, good operability,
- Variable speed fan for airflow control
- Good grounding protection
- Ionization indicator

# ESD VACUUM PICK-UP FOR SMD

Vampire is the new battery-free hand held vacuum pick up pen designed for the safe pick-up of SMD components during assembly, test and rework processes. With fountain-pen dimensions, Vampire grabs, lifts and places components in complete safety, aided by a powerful internal piston and a full ESD protection. A complete choice of tips designed for any size of SMD component helps the operator to have always the right tool in hand. The Classic Vampire includes curved and straight needles, plus 4,6,and 9mm ESD cups. The solid plated aluminium body, the powerful piston mechanism, the ergonomic grip make Vampire the best portable tool for SMD on the market.

00C SA	Tweezers with flat and thick tips	15AP Carbone	Same as 15A, but with parallel cut along the blades - CARBON
00D SA	Tweez with flat, heavy, internally serrated tips & externally serrated	18 SA	Tweezers for straightening or flattening small wires
0A SA	Tweezers with very fine tips, ideal for watch-repairers	19 SA	Tweezers serrated internally and externally on the handles
0C9 SA	Flat tweezers with very fine tips and thin blades	19P SA	Same as 19, but with bent tips
0C10 SA	Flat tweezers with very fine tips and thin blades	26 SA	Tweezers with very strong and flat tips
0C11 SA	Flat tweezers with very fine tips and thin blades	27 SA	Same as 26, but with thinner blades
0R SA	Tweezers with fine tips and thin blades with reverse action	29D/16 SA	Tweezers for removing dips, 16mm
1 SA	Tweezers with strong tips and thin blades	29D/22 SA	Tweezers for removing dips, 22mm
2 SA	Tweezers with sharp blades and strong tips	29D/28 SA	Tweezers for removing dips, 28mm
2A SA	Tweezers with rounded and flat tips	30D/16 SA	Tweezers with curved tips for removing dips, 16 mm
2AB SA	Tweezers with rounded and bent tips	30D/22 SA	Tweezers with curved tips for removing dips, 22 mm
2AR SA	Tweezers with rounded and flat tips with reverse action	30D/28 SA	Tweezers with curved tips for removing dips, 28 mm
2AT SA	Tweezers with rounded and flat teflon tips	31D/28 SA	Tweezers with large and flat tips for removing dips, 28 mm
3 SA	Tweezers with strong tips and thin blades	31D/40 SA	Tweezers with large and flat tips for removing dips, 40 mm
3C SA	Tweezers with strong tips and thin blades	33 SA	Tweezers with reverse action
3D SA	Tweezers with three teeth for wafer handling	33A SA	Same as 33, but with bent tips
3DT SA	Tweezers with three teflon teeth for wafer handling	34A SA	Tweezers with flat tips for handling of very small parts
4 SA	Tweezers with very fine and sharp tips	35A SA	Tweezers for handling of flat parts like wafers and flat capacitors
4A SA	Tweezers with sharp and strong tips	36A SA	Tweezers with flat and angled tips for handling of very small parts
4D SA	Tweezers with four teeth with flat lower tip for wafer handling	37S SA	Wafer handling tweezers with stop pins
4DW SA	Tweezers with flat lower tip for wafer handling	38 SA (SMD)	Tweezers with a hole on the tip, Ø 1mm
4R SA	Tweezers with very fine and sharp tips with reverse action	40A SA (SMD)	Tweezers with a rhombus-shaped hole on its tip, Ø 0,71mm
5 SA	Tweezers with very fine and sharp tips, ideal for SMD applica- tions	51S SA	Tweezers with very fine tips bent at 40°
5A SA	Tweezers with very fine, sharp and oblique tips	62A SA	Tweezers with flat, rounded and bent tips
5AR SA	Same as 5A, but with reverse action	65A SA	Tweezers with long & thin form and very fine tips bent at 40°
5B SA	Tweezers with very fine and sharp tips, tips bent at 40°	85A SA	Tweezers for wafer handling
5C SA	Tweezers with sharp and strong tips; similar to 5 but shorter	85C SA	Tweezers for wafer handling
5D SA	Tweezers with five teeth with flat lower tip for wafer handling	85L SA	Tweezers for wafer handling
5DW SA	Tweezers with flat lower tip for wafer handling	-	Nylon acid proof tweezers
6 SA	Tweezers with fine hook-shaped tips	102 SA (SMD) 102R SA	Tweezers for handling of chips and SMD components; angled tips
6D SA	Tweezers with six teeth with flat lower tip for wafer handling	(SMD)	Same as 102, but with reverse action
6DWF SA	Tweezers with six teeth with bent lower tip for wafer handling	103 SA (SMD)	Tweezers for handling of chips and SMD comp; angled & bent tips
7 SA	Tweezers with very fine and bent tips	103R SA (SMD)	Same as 103, but with reverse action
7A SA	Same as 7, but with stronger tips	104 SA (SMD)	Tweezers for handling of SMD components
7B SA	Same as 7, but with blades internally serrated	105 SA (SMD)	Tweezers for handling of SMD components; bent tips
7E SA	Same as 7, but with flat & bent tips	106 SA (SMD)	Tweezers for handling of SMD components
7R SA	Same as 7, but with reverse action	107 SA (SMD)	Tweez for handling of SMD components; hole in the tips Ø 0,75 mm
8 SA	Tweezers for bending and straightening wires and small pins	108 SA (SMD)	Tweezers for handling of SMD components
11 Nickel	Tweezers with strong tips - NICKEL	109 SA (SMD)	Tweezers for handling of SMD components
12 Nickel	Tweezers with strong tips - NICKEL	110 SA (SMD)	Tweezers for handling of SMD components
13S SA	Tweezers with strong, flat and serrated tips	111 SA (SMD)	Tweezers for handling of SMD components

# **LENSES WITH ILLUMINATION**

# Art. TEVISIO

- 48 premium SMD LEDs
- 40 % energy savings
- Up to 6,000 lx at just 14 W
- Maintenance-free: LED life of up to 50,000 h and more
- Continuously dimmable down to 10 %
- Variants with Visualizer function for identifying structures and faults
- Color reproduction level 1A
- 3.5 diopters for approximately double magnification
- Absolutely scratch-proof glass magnifier, optionally nonreflecting
- Wide field of vision with Ø 153 mm for distortion-free vision
- Robust aluminum and high-performance plastic
- · Closed joints protect the internal cables
- Enormous operating radius, uniquely flexible head joint
- Balanced arm, easily adjustable, can be precisely fixed if needed
- Also available in ESD design

# Art. SNL 319

- Extremely high illuminance
- Change of the lighting character by different settings of the illuminant for shadow-free light or light with shadow to highlight 3D structures
- Wide-range field of inspection
- Flexible luminaire head that is conveniently adjustable in all directions
- Low energy consumption
- Also available in ESD design
