

Analog Discovery 2x15 Ribbon Cable

Product Description

This cable is a handy accompaniment to your Analog Discovery or Analog Discovery 2. This ribbon cable allows you to extend all 30 pins on the 2x15 pin male connector to a 2x15 pin female connector. The ribbon cable allows the pins of the 2x15 female connector on the Analog Discovery 2 to be connected directly to the Basys MX3 for easy signal investigation.

Features:

- Allows you to extend the Analog Discovery signals to a female header
- 2x15 keyed female connector with all 30 color-coded signal wires connected to a second 2x15 female connector
- The cable is 7 3/4" (19.68 cm) long
