

## AM-SA Stand for AM120 Micro Tweezers

The Sleep & Hibernation modes automatically reduce the tip temperature when the tool is in the stand. As a result, a tip's life lasts up to 5 times longer.

The Quick Cartridge Changer allows changing the cartridges easily without having to turn the station off. This allows you to work on different soldering jobs.

Moreover, the AD-SE allows you to store up to 4 cartridges easily.

The tool holder and the cable collector are easily adjustable to suit your work position and to keep the working area free of cable.
