

## **PIC-PG3 - PARALLEL PORT PIC 8/18/28/40 PIN DEVICES PROGRAMMER**

### **FEATURES:**

- PIC-PG3 is programmer based on D.Tait's parallel port design. To operate it needs external power supply 12-15VAC or 16-18VDC. It supports all 8/18/28 and 40 pin PIC microcontrollers which allow serial programming. PIC-PG3 have connector and cable for ICSP programming and can be used to program all PIC-PxxB prototype boards.
- The supported devices depend on the current version of ICPROG software.
- Dimensions 75x58 mm (3x2.3") + 30 cm (12") ICSP cable

### **DOCUMENTS:**

- NOTE: The programmer may not work with low power serial interfaces - i.e. laptop or notebook serial ports. USB to serial cables have also not been proven to work.
