2. General Description

2.1 Description

KWH050ST19-F01 is a Transmissive type color active matrix liquid crystal display (LCD), which uses amorphous thin film transistor (TFT) as switching devices. This product is composed of a TFT LCD panel, driver IC, FPC and backlight unit. The following table described the features of FORMIKE KWH050ST19-F01.

2.2 Application

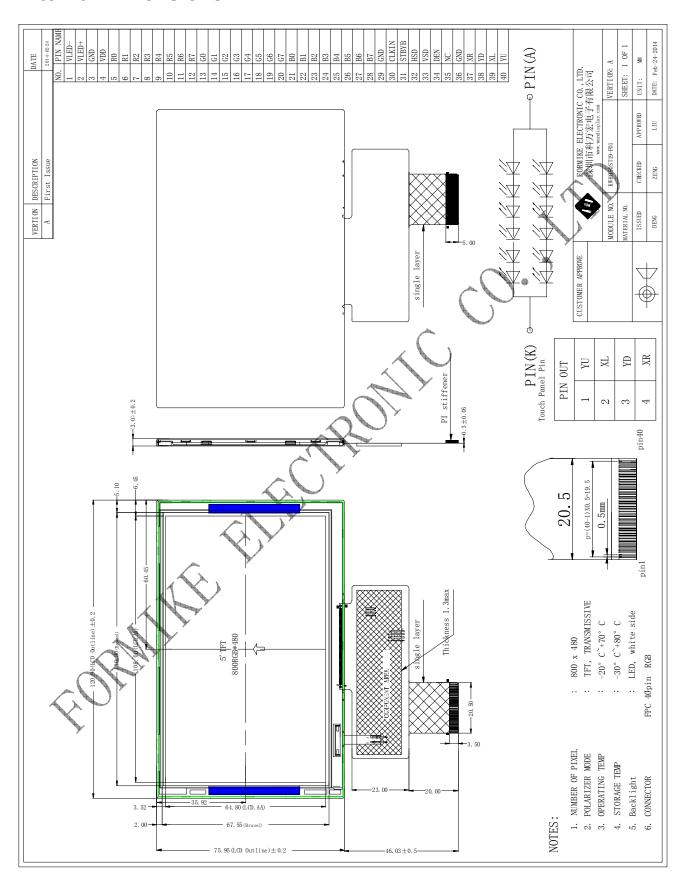

Mobile phone, Multimedia products and other electronic Products Etc.

2.3 Features:

-eatures:		
Features	Description	UNITS
LCD type	5"TFT	
Dot arrangement	800 (RGB) ×480	dots
Driver IC	OTA7001A and OTD9960A	
Color Depth	16.7M	
Interface	24-Bit RGB Interface	
View Direction	6 O'clock	
Module size	120.9(W) ×75.95 (H)×3.0(T)	mm
Active area	108.00(W) ×64.80(H)	mm
Dot pitch	0.135 (W) ×0.135 (H)	mm
Back Light	12 White LED In serial/parallel	
With/Without TSP	Without TSP	
Weight(g)	TBD	

3. External Dimensions

4. Interface Description

Pin	Symbol	Functional	Rema
No. 1	VLED-	Dower for LED healdight authods	rk
2	VLED-	Power for LED backlight cathode.	
3	GND	Power for LED backlight anode.	
4	VDD	Power ground.	
5	R0	Power voltage.	
6	R1	Red data(LSB).	•
7	R2	Red data.	
			y
8	R3	Red data.	
9	R4	Red data.	
10	R5	Red data.

Module No.: KWH050ST19-F01

10. Reliability Test Conditions And Methods

NO.	TEST ITEMS	TEST CONDITION	INSPECTION AFTER TEST			
1	High Temperature Storage	8 0°C±2°C×200Hours				
2	Low Temperature Storage	-30°C±2°C×200Hours				
3	High Temperature Operating	70 °C±2°C×120Hours	Lucy action of the way			
4	Low Temperature Operating	-20℃±2℃/120Hours	Inspection after 2~4hours storage at room temperature, the samples			
(5)	Temperature Cycle(Storage)	- 30 °C ± 2 °C ← 25 °C 80 °C ± 2 °C (30min) (5min) (30min) (1cycle) 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	should be free from defects: 1,Air bublle in the LCD. 2,Sealleak. 3,Non-display. 4,Missing segments.			
6	Damp Proof Test	50 °C±5°C×90%RH×120Hours	5,Glass crack. 6,Current IDD is twice higher than initial value. 7, The surface shall be free from damage. 8, The electric Characteristics requirements shall be satisfied.			
7	Vibration Test	Frequency:10Hz~55Hz~10Hz Amplitude:1.5M X,Y,Z direction for total 3hours (Packing Condition)				
8	Drooping Test	Drop to the ground from 1M height one time every side of carton. (Packing Condition)				
9	ESD Test	$\begin{array}{ccc} \textbf{Voltage:} & \pm & \text{8KV, R:} 330 \\ \Omega & & \text{, C:} 150 \text{PF, Air} \\ \text{Mode, } 10 \text{times} \end{array}$				

REMARK:

- 1,The Test samples should be applied to only one test item.
- 2, Sample side for each test item is 5~10pcs.
- 3, For Damp Proof Test, Pure water (Resistance $> 10 \text{M}\Omega$) should be used.
- 4, In case of malfunction defect caused by ESD damage, if it would be recovered to normal state after resetting, it would be judge as a good part.
- 5, EL evaluation should be excepted from reliability test with humidity and temperature: Some defects such as black spot/blemish can happen by natural chemical reaction with humidity and Fluorescence EL has.
- 6, Failure Judgment Criterion: Basic Specification Electrical Characteristic, Mechanical Characteristic, Optical Characteristic.

11.Inspection Standard

This standard apply to TFT module specification.

1. Inspection condition:

Under daylight lamp 20 $\sim\!40\text{W}_{\odot}$ product distance inspector'eye 30cm,incline degree 30 $^{\circ}$ $_{\circ}$

2. Inspection standard

NO.	Item	Inspection standard				Rate
2.1	Dot	Case of Dot defect is below ① Bright Dot (whit spot): "0" ② Dark Dot (black spot): "0" (In case of Dark Dot on Main TFT LCD) - NG if there's full Dot defect. - Damaged less than the size of sub-pixel is not counted as defect - Dots darker than the size of sub-pixel are not defined as bright dot defect				
		area size (mm)		Acceptable number		minor
		Ф ≤ 0.10		ignore		
		0.10<Ф≤0.15		3		
		0.15<Ф≤0.20		2		
		0.25< Ф ≤ 0.25		1		
		0.25<⊕		0		
	line	1				
		Size (mm)		Acceptable number		
2.2		ignore	W≤	€0.03	ignore	
		L≪4.0	0.03 <w≤0.04< td=""><td>2</td><td rowspan="2"></td></w≤0.04<>		2	
		L≪4.0	0.04 <w≤0.05< td=""><td>1</td></w≤0.05<>		1	
			0.05 <w< td=""><td>Treat with dot non-conformance</td><td></td></w<>		Treat with dot non-conformance	

Module No.: KWH050ST19-F01

12. Handling Precautions

12.1 Mounting method

The LCD panel of FORMIKE ELECTRONIC CO,.LTD. module consists of two thin glass plates with polarizes which easily be damaged. And since the module in so constructed as to be fixed by utilizing fitting holes in the printed circuit board.

Extreme care should be needed when handling the LCD modules.

12.2 Caution of LCD handling and cleaning

When cleaning the display surface, Use soft cloth with solvent [recommended below] and wipe lightly

- İsopropyl alcohol
- Ethyl alcohol

Do not wipe the display surface with dry or hard materials that will damage the polarizer surface. Do not use the following solvent:

- Water
- Aromatics

Do not wipe ITO pad area with the dry or hard materials that will damage the ITO patterns Do not use the following solvent on the pad or prevent it from being contaminated:

- Soldering flux
- Chlorine (Cl) , Salfur (S)

If goods were sent without being sili8con coated on the pad, ITO patterns could be damaged due to the corrosion as time goes on.

If ITO corrosion happen by miss-handling or using some materials such as Chlorine (CI), Salfur (S) from customer, Responsibility is on customer.

12.3 Caution against static charge

The LCD module use C-MOS LSI drivers, so we recommended that you:

Connect any unused input terminal to Vdd or Vss, do not input any signals before power is turned on, and ground your body, work/assembly areas, assembly equipment to protect against static electricity.

12.4 packing

- Module employ LCD elements and must be treated as such.
- Avoid intense shock and falls from a height.
- To prevent modules from degradation, do not operate or store them exposed direct to sunshine or high temperature/humidity

12.5 Caution for operation

- It is an indispensable condition to drive LCD's within the specified voltage limit since the higher voltage then the limit cause the shorter LCD life.
- An electrochemical reaction due to direct current causes LCD's undesirable deterioration, so that the use of direct current drive should be avoided.
- Response time will be extremely delayed at lower temperature then the operating temperature range and on the other hand at higher temperature LCD's how dark color in them. However those phenomena do not mean malfunction or out of order with LCD's, which will come back in the specified operation temperature.
- If the display area is pushed hard during operation, some font will be abnormally displayed but it resumes normal condition after turning off once.
- A slight dew depositing on terminals is a cause for electro-chemical reaction resulting in terminal open circuit.
 Usage under the maximum operating temperature, 50%Rh or less is required.

Module No.: KWH050ST19-F01

12.6 storage

In the case of storing for a long period of time for instance, for years for the purpose or replacement use, the following ways are recommended.

- Storage in a polyethylene bag with the opening sealed so as not to enter fresh air outside in it. And with no
 desiccant.
- Placing in a dark place where neither exposure to direct sunlight nor light's keeping the storage temperature range.
- Storing with no touch on polarizer surface by the anything else.
 It is recommended to store them as they have been contained in the inner container at the time of delivery from us

12.7 Safety

- It is recommendable to crash damaged or unnecessary LCD's into pieces and wash off liquid crystal by either of solvents such as acetone and ethanol, which should be burned up later.
- When any liquid leaked out of a damaged glass cell comes in contact with your hands, please wash it off well with soap and water

13. Precaution For Use

13.1

A limit sample should be provided by the both parties on an occasion when the both parties agreed its necessity. Judgment by a limit sample shall take effect after the limit sample has been established and confirmed by the both parties.

13.2

On the following occasions, the handing of problem should be decided through discussion and agreement between responsible of the both parties.

- When a question is arisen in this specification
- When a new problem is arisen which is not specified in this specifications
- When an inspection specifications change or operating condition change in customer is reported to FORMIKE ELECTRONIC CO, LTD, and some problem is arisen in this specification due to the change
- When a new problem is arisen at the customer's operating set for sample evaluation in the customer site.
