

ASMT-Rx45-xxxxx

0.45-mm Leadframe-Based Surface Mount ChipLED

Description

The ultra-thin ASMT-Rx45 ChipLEDs from Broadcom[®] were developed based on the industrial standard ChipLED 0603 platform, which requires less board space. These ChipLEDs provide a wide viewing angle of 130 degrees to improve visibility in bright sunlight.

In addition to the high-brightness and compact size, Broadcom's ASMT-Rx45 ChipLEDs provide two significant advantages in the production environment: They can be easily soldered using the IR solder reflow process, and the package is qualified to a Joint Electronic Device Engineering Council (JEDEC) moisture sensitive level (MSL) rating of 2a. For manufacturers, this rating means that these ChipLEDs can be kept in the open air (30°C, 60% relative humidity) for up to four weeks after being removed from its sealed package without the need to remove absorbed moisture.

Broadcom's ultra-thin Leadframe ChipLED is available in red, orange, yellow green, and amber colors. The ASMT-Rx45 series is ideal for use by lighting designers developing backlighting for dashboards and entertainment consoles in automobiles, backlighting of industrial switches and buttons, and small pixel indoor signs.

Features

- Industrial 0603 platform – 1.6 mm × 0.8 mm × 0.45 mm
- Automotive qualified
- Super wide 145° viewing angle
- JEDEC MSL 2a.
- Robust operating temperature from –40°C to +100°C
- Junction temperature $T_J = 110^\circ\text{C}$
- Available in 4000 parts per reel
- RoHS and IR reflow compatible

Applications

- Interior automotive
 - Navigation backlighting
 - Audio panel backlighting
 - Push button backlighting
- Office automation, home appliances, and industrial equipment
 - Front panel backlighting
 - Push button backlighting
 - LCD backlighting
 - Switch backlighting
 - Navigation backlighting

CAUTION! ASMT-Rx45 LEDs are Class 1C ESD sensitive per JESD22-A114C.01. Observe appropriate precautions during handling and processing. Refer to Application Note AN-1142 for additional details.

Package Dimensions

NOTE:

1. All dimensions are in millimeters.
2. Tolerance is ± 0.1 mm unless otherwise specified.

Device Selection Guide

Part Number	Min. I_v (mcd)	Typ. I_v (mcd)	Test Current (mA)	Colors	Dice Technology	Package Description
ASMT-RR45-AQ902	90.0	120.0	20	Red	AllnGaP	Untinted, Diffused

ASMT-RH45-AQ502	71.5	110.0	20	Red Orange	AllnGaP	Untinted, Diffused

NOTE:

1. The luminous intensity, I_v , is measured at the peak of the spatial radiation pattern, which may not be aligned with the mechanical axis of the LED package.
2. Tolerance: $\pm 15\%$.

Moisture Sensitivity

This product is qualified as Moisture Sensitive Level 2a per JEDEC J-STD-020. Take precautions when handling this moisture sensitive product to ensure the reliability of the product. Refer to Broadcom Application Note AN5305, *Handling of Moisture Sensitive Surface Mount Devices* for details.

Storage Before Use

- An unopen moisture barrier bag (MBB) can be stored at < 40°C/90% RH for 12 months. If the actual shelf life has exceeded 12 months and the humidity indicator card (HIC) indicates that baking is not required, then it is safe to reflow the LEDs per the original MSL rating.
- Do not open the MBB prior to assembly (for example, for IQC).

Control after Opening the MBB

- Read the HIC when opening the MBB.
- Keep the LEDs at < 30°C/60% RH at all times and for all high-temperature related processes, including soldering, curing, or rework that must be completed within 672 hours.

Control for the Unfinished Reel

- Store unused LEDs in a sealed MBB with desiccant or desiccator at < 5%RH.

Control of Assembled Boards

- If the PCB soldered with the LEDs is to be subjected to other high-temperature processes, store the PCB in a sealed MBB with desiccant or desiccator at <5% RH to ensure that no LEDs have exceeded their floor life of 672 hours.

Baking Is Required for the Following Conditions

- "10%" or "15%" on the HIC turns pink.
- The LEDs are exposed to conditions of > 30°C/60% RH at any time.
- The LEDs' floor life exceeded 672 hours.

The recommended baking condition is 60°C ± 5°C for 20 hours.
