

ESD Brushes

ESD brushes are designed to eliminate the danger of static build-up on populated PC boards when used. Our program covers a complete choice of brushes both for dust and residues removal, or for flux and solvent dispensing during the rework operations. Different dimensions available, both plastic or metal handles, can be used either dry or wet.

Item: **EB PRO**

Description:

Bigger nailbrush style. Plastic protected handle, synthetic bristles. Length 100mm, bristles area 80x40mm, bristles length 20mm
