# JOY-IT

SBC-OLED01
0.96 Inch– I²C-OLED-Display

This small 0.96 inch (approx. 2.44 cm) OLED display with SSD1306 controller works with an I2C interface, making it easy to use with Arduino, Raspberry Pi or other single-board computers or micro-controllers.

Due to OLED technology , no background lighting is required, as each pixel illuminates itself. This always ensures a high-contrast image and lower power consumption.
