

STORAGE CABINETS

Storage Cabinets are specifically designed for the storage of small parts and components. The Cabinets are made from sheet steel and are available in 5 different sizes, all of which can be either hung or placed side by side in any combination to form a compact storage unit. The cabinets are powder coated with colours according to the RAL scale of colours. The drawers are available in 2 convenient sizes with a wide handle for easy access and a lip at the back to prevent them falling out of the Cabinet. Both the drawers and dividers are made from clear, unbreakable polystyrene.
