Overview

The Small Solar Panel 55x70mm 0.5W is a monocrystalline panel offering high solar energy transformation efficiency in a compact design, featuring a waterproof resin surface and sturdy back for outdoor use. It includes a 2mm JST connector for integration with solar-powered boards, suitable for applications such as sun tracking chargers and automatic brightness sensors.

Key Features

- Made of single-crystal material (monocrystalline) that performs high solar energy transformation efficiency
- Small but able to provide enough power for your DIY projects
- A fine resin surface which makes it waterproof and a sturdy back suitable for outdoor environments
- A 2mm JST connector is attached to the panel, which makes it perfect to team up with most of our can-use-solar-power-supply boards

Applications

- Sun Tracking Charger
- Automatic Brightness Sensor
