

DISCONTINUED

DRS Stand works exclusively with DR560 Desoldering Iron and DIU, DDU and DMU Control Unit.

Sleep & Hibernation Modes automatically detect the tool in the stand and reduces the tip temperature below the solder melting point. Hibernation cuts off power supply preventing oxidation. As a result, tip life lasts up to 5 times longer.

The stand features Cartridge Holder which allows you to store up to four tips, as well as the spanner which is used to remove and replace the tips.

The position of the tool holder is easily adjustable to suit your needs and Cable Collector is designed for perfect movement adaptation and to keep cables away from the working area.

**Don't believe us...
