

JBC HTS

for HT420

HTS Stand works exclusively with HT420 Thermal Tweezers and DI, DDE and DME Control Units.

The Intelligent Heat Management automatically detects the tool in the stand and reduces the tip temperature below the solder melting point. Hibernation cuts off power supply preventing oxidation. As a result, tip life lasts up to 5 times longer.

The stand includes **Tip Cleaner** with Brass Wool, as well as, splashguard and antisplash membrane to keep the work area clean and free of solder particles. **Quick Cartridge Exchanger** enables a safe, easy and quick cartridge exchange which, combined with **Cartridge Holder**, allows you to store up to four cartridges.

Tool Holder position is easily adjustable to suit your needs and **Cable Collector** is designed for perfect movement adaptation and to keep cables away from the working area.
