

INDUSTRIAL PRODUCT DATASHEET

Water Flow Sensor YF-B2

YF-B2 water flow sensor with copper body and hall-effect sensor, designed for reliable flow detection in water dispensers and coffee machines.

SKU

114991172

UPDATED

PRICE

\$5.90(Excl. VAT)

Overview

The YF-B2 water flow sensor features a copper body, water rotor, and hall-effect sensor that outputs pulse signals corresponding to flow rate. It offers compact, easy installation, high sealing, and long lifespan, suitable for water dispensers and coffee machines.

Key Features

Water flow sensor consists of a copper body, a water rotor, and a hall-effect sensor. When water flows through the rotor, rotor rolls. Its speed changes with different rate of flow. The hall-effect sensor outputs the corresponding pulse signal. This one is suitable to detect flow in water dispenser or coffee machine.

Life is longer than plastic body.

Features

- Compact, Easy to Install
- High Sealing Performance
- High Quality Hall Effect Sensor
- RoHS Compliant

Part List

1 x YF-B2 water flow sensor
