

USB-PD TRIGGER MODULE

COM-ZY12PDG

With this small module, you can trigger USB PowerDelivery protocols and thus, for example, charge your laptop via a PD-capable USB-C power supply unit. The output voltage can be adjusted in 5 steps (5 V, 9 V, 12 V, 15 V and 20 V) via the button integrated on the module as well as via the trigger input. The currently selected voltage can be read from the colour of the RGB LED integrated on the module. Due to its interfaces and design, the module can be used flexibly and is highly integrable.

MAIN FEATURES

Output voltage	5 V / 9 V / 12 V / 15 V / 20 V (adjustable via button)
Supply voltage	(up to 20 V / 100 W) USB-PD-capable power supply (not included)
Output current	5 A max.
Output power	100 W max.
Input interface	Solder pads
Output interface	Solder pads

FURTHER SPECIFICATIONS

Special features	Adjustable output voltage, flexible applicable
Dimension	20 x 15 x 3.5 mm
Items delivered	COM-ZYPDN module
