Description

The **Akyga® AK-CA-65 adapter** is a high-quality **power splitter**. It allows you to split an existing **4-pin connector** into three single connectors: **2x 4-pin** and **1x 3-pin**. The adapter has been created for powering fans in PC cases. It comes in handy if you want to connect a larger number of fans but only have one free 4-pin connector. Furthermore, after connecting the adapter to a fan controller, you will be able to read and adjust the fan speed by **controlling the PWM signal**.
