Description

The **Akyga® AK-CH-21 power adapter** combines the functionality of a USB mains charger and an extension cable. It is ideal for those looking for a versatile way to **quickly charge** multiple devices simultaneously. This charger features **two USB Type-C ports** and **one USB-A port**. The main USB-C port offers **65 W** power, perfect for fast charging laptops, while the second USB-C and USB-A ports provide **30 W** power each, great for phones, wireless headphones and other accessories. What's more, thanks to the use of breakthrough **GaN (gallium nitride) technology**, the AK-CH-21 impresses with its compact size and unparalleled efficiency. It is definitely more than a simple USB-C charger - it is a high-tech device that provides higher power than traditional chargers. In addition, the charger supports fast charging technologies such as **Power Delivery** and **Quick Charge 3.0**, along with support for the Programmable Power Supply (PPS) protocol. With these, the charger offers maximum charging performance and **adaptive power adjustment** to the requirements of the connected device.

The AK-CH-21 USB charger is equipped with a universal **230 V AC socket**. This feature adds extra functionality, allowing the connection of another charger or any device with a **Schuko** plug, making it an ideal desk charging station.

The USB-C wall charger also has an integrated **1.5 m CEE 7/7 power cable**. It can easily be connected into the power socket under a table, making it easier to maintain the aesthetic and organized workspace. This functionality makes the AK-CH-21 ideal for those who value both performance and the aesthetics of their desk.
