

6 MODULE FLAT ENCLOSURES FOR M36 DIN-RAIL

SERIES
1050 FLAT

The Series 1050 flat is a compact 6 module enclosure, designed for applications that don't require extra space above the PCB. By reducing this space and eliminating the need for long spindles for switches, trimmers, and light guides for LEDs, this enclosure helps our customers save money and space.

Series 1050 flat is, if requested, available with engraved terminal numbers and symbols, and with custom made holes in the front. Lid, PCB, customized label, and packing is available. A closed version without terminals is also available. Light conductors and spindles that fit the height of the box are available.
