

INDUSTRIAL PRODUCT DATASHEET

SeedGrove -Transformers

A SeedGrove compatible current transformer module for measuring alternating current up to 5A with high accuracy.

SKU

101020027

UPDATED

PRICE

\$6.50(Excl. VAT)

Overview

The SeeedGrove -Transformers module uses the TA12-200 current transformer to convert large alternating current into a small amplitude, allowing measurement up to 5A. It offers a SeeedGrove compatible interface, high accuracy, and compact size, suitable for alternating current measurement and device condition monitoring.

Key Features

The Transformers module is based on the TA12-200 current transformer which can change large alternating current into a small amplitude. You can use it to test large alternating current upto 5A.

Features

- SeedGrove compatible interface
- Maximum 5A input
- High accuracy
- Small size

Applications

- Alternating current measurement
- Device condition monitoring

For all SeedGrove users (especially beginners), we provide you guidance PDF documents. Please download and read through [Preface - Getting Started](#) and [Introduction to SeedGrove](#) before your using of the product.
