

TRESTON bins made from conductive polypropylene fit all standard shelves with a depth 300,400, 500 and 600mm, some models are also used in the visible storage cabinets.

The storage bins have a corrugated base making it easier to pick very small items.

Bin		Bottom	Outer dim. mm A x B x H	Inner dim. mm A x B x H	Dividers (optional)			
Code	Type				Code	Type	Quantity per bin

# Storage cabinets

LICEFA Cabinets, made of conductive polypropylene, will provide systematic storage of loose SMD components and other small parts. Drawers can be fitted with Vacuum-formed inserts or with cups to give more compartments.

The cabinets, four different sizes, are normally supplied with the following assemblies: mod. 20 /6 drawers, mod. 22 /9 drawers, mod. 40 /6 drawers, mod. 62 /4 drawers.

To assemble cabinets with another number of drawers, it is needed one rim-frame for each drawer and one base-foundation for each cabinet. Transparent adhesive labels with exchangeable yellow paper are available in three different size.
