

DUINOMITE-TBA

A DUIINOMITE GPIO extension board perfect for breadboarding

You can lead out the GPIO signals from DUIINOMITE boards to a breadboard easily by using DUIINOMITE-TBA. Breadboarding this way you will significantly reduce the soldering needed.

FEATURES

- Pins for the 5V, 3.3V and GND lines
- Ribbon cable with 26 pin connectors compatible with all DUIINOMITE boards that feature GPIO connector
- Compatible with OLIMEX BREADBOARD-1(which is sold separately)
