## Description

Advanced Power MOSFETs from APEC provide the designer with the best combination of fast switching, low on-resistance and cost-effectiveness.

The AP9963GP-HF-3 is in the TO-220 package, which is widely used for commercial and industrial applications, and is well-suited for low voltage applications such as DC/DC converters and motor drives. The TO-220 through-hole package is often used where a small PCB footprint or an attached heatsink is required.
