Description

Advanced Power MOSFETs from APEC provide the designer with the best combination of fast switching, ruggedized device design, low on-resistance and cost-effectiveness.

The AP6950GYT-HF-3 includes both hi-side ("control") FET and lo-side ("sync") FET for the power output stage of a synchronous buck converter. It is supplied in the PMPak[®]3x3 package, which offers a backside heat sink and a low package profile.
