

DCDC6-16-TO5

**CONVERTOR FROM 6-16V DC TO 5V/2A DC**

Allow your Raspberry Pi, A13-OLinuXino-MICRO, BeagleBone etc boards which require 5V input power supply to be powered with any adapter from 6 to 16V DC. If you want to use your 5V boards in car this module will provide 5V 2A output. The input is Power jack which match with PWR-CABLE, The output is USB typeA host connector which you can connect to your board with USB-A mini cable.
