

PIC-H1503

PIC-H1503 IS A SMALL HEADER BOARD SUITABLE FOR BREADBOARDING AND FEATURING PIC16F1503

PIC16F1503 is a nice small 8-bit processor with only 49 instructions. Despite its low power profile, it has many extras such as two internal oscillators, a 16-level deep hardware stack, an integrated temperature indicator among others. It has an ADC, 2 comparators, 12 I/O pins, 4 x 10-bit PWM modules

FEATURES

- PIC16F1503 - 8-bit low power reduced instruction set processor featuring ADC, 2 comparators, 12 i/o pins, 4x10-bit PWM modules, built-in oscillators, temperature indicator etc
- 2 row headers (0.5" distance) for easy mount on a breadboard
- ICSP connector for programming / debugging with compatible programmer
- FR-4, 1.5 mm (0,062"), red soldermask, white silkscreen component print
- Dimensions 23.62 x 15.24 mm (0.93x0.60")
